

Overview

I am a developer who is passionate about semantics, ecstatic about user experiences, and wistful for the `<blink>` tag. My unique background of traditional computer science and graphic design enables me to solve visual problems with efficient code. I have over 4 years of experience in designing and developing responsive user interfaces for screens of any size. My objective is to work for a company that is excited about building highly usable, fast, responsive web applications.

Education

Taylor University, Upland Indiana

<http://taylor.edu>

August 2012 – May 2016 (expected)

B.S. Computer Science New Media Systems, 3.74/4.0
